Summit Hosting Acquires QuickBooks Hosting Provider HarborCloud

Part of a focused strategy of growth, the acquisition significantly expands the company's QuickBooks hosting customer base and market share.

ATLANTA, GEORGIA – [June 05, 2018] — Summit Hosting, a business software hosting provider focused on Sage and QuickBooks applications, has announced their acquisition of HarborCloud. Part of a focused strategy of growth that began a couple of years ago, the acquisition will significantly expand the company's [QuickBooks hosting](#) customer base and market share.

Stan Kania, [Summit Hosting](#) CEO, says that both companies have a similar focus on quality service and customer support. "Since 2011, HarborCloud has made a name for themselves as a premier QuickBooks hosting provider which is reflected in their historically high customer retention rate. Customer retention and satisfaction is something we, too, heavily emphasize as a company so the acquisition seemed to provide a very natural fit and growth opportunity for our business."

In addition to growing the company's QuickBooks Hosting business, the acquisition also expands Summit Hosting's reach geographically and helps to ensure that live support staff is available to assist customers in various time zones and on both coasts. Kania adds, "Not only are we adding valuable QuickBooks hosting resources and experienced staff to our team, we also look forward to working with their strong and knowledgeable network engineering group."

"We've quickly become a very significant player in the cloud-based hosting space," says Kania. "Our business is strong and we've got the financial resources to execute on a very aggressive strategy of growth, both organically and through strategic acquisition. We're excited to have the HarborCloud team and customers join Summit Hosting and look forward to continuing this exciting journey as other opportunities for growth and acquisition present themselves."

About Summit Hosting

Summit Hosting was founded by Stanley Kania in 2016 through the merging of myownASP.com and NovelAspect.com. Bringing these companies together and creating Summit Hosting has catapulted the business into becoming the leading hosting provider for QuickBooks and Sage Programs.

Summit Hosting provides cloud-based hosting to U.S.-based and international businesses, delivering the highest level of performance, security and customer service. They offer clients dedicated servers in addition to hosting several 3rd party applications. Your experience with Summit Hosting begins with a knowledgeable U.S.-based sales team. They work with you to understand your business, goals, and hosting needs. Once they've developed the right solution to meet your objectives, Summit Hosting puts that plan in to action with their technical team.

With a team of certified support professionals available 24/7 to provide help, company is 100% customer-focused, a principle that has guided the business since its inception. Summit Hosting understands the importance of providing flawless customer support, as well has how to deliver that.
